## Résumé

EOSC-Life brings together the 13 Life Science ‘ESFRI’ research infrastructures (LS RIs) to create an **open, digital and collaborative space for biological and medical research**.

The project publishes **‘FAIR’ data** and a **catalogue of services** provided by participating RIs that enable the **management, storage and reuse of data** in the European Open Science Cloud (EOSC).

The project ensures that this space is **accessible to European research communities**.

**Mots-Clés:** EOSC, EOSC, Life
